PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on training at SMEC Technologies and practical technical skills across Python, SQL, Power BI, and MS Excel. Experienced in building automated web data collection pipelines, tabular data cleaning and validation with Pandas, and constructing structured spreadsheet models and dashboards. Skilled in writing SQL queries, data processing, and Python automation to transform operational data into clear, reliable reporting insights.

PROFESSIONAL EXPERIENCE

Data Analyst Trainee | SMEC Technologies

June 2026 – Present | Kochi, India

- Extract, clean, transform, and analyze multi-source datasets using Python, SQL, MS Excel, and Power BI.
- Perform structured data cleaning, schema validation, and missing-value normalization with Pandas for reliable analysis.
- Author SQL queries to retrieve and aggregate relational data, supporting automated Excel reporting and Power BI dashboards.

PROJECTS

Infopark Job Web Scraper

[GitHub: p1-infopark-job-web-scraper](#)

Tech Stack: Python, Requests, BeautifulSoup, Pandas, OpenPyXL, MS Excel

- Engineered an automated Python web scraping ETL pipeline to collect multi-page job listings from Infopark Kerala.
- Extracted key fields (Job Title, Company, Date, Deadline, URL) using BeautifulSoup with rate-aware request delays.
- Implemented duplicate detection and normalization in Pandas; automated styled Excel export via OpenPyXL with auto-filters.

Library Management System

[GitHub: p2_library_Management_system](#)

Tech Stack: Python, Object-Oriented Programming (OOP), OpenPyXL, MS Excel

- Architected an object-oriented Python inventory system to automate book cataloging and multi-copy shelf management.
- Designed Book and Library classes with OOP encapsulation to compute total, available, and issued copy counts dynamically.
- Built console routines for catalog search, stock adjustments, and synchronized Excel database persistence via OpenPyXL.

NOVA – Windows Voice & Automation Assistant

[GitHub: p3_nova_voice_assistant](#)

Tech Stack: Python, SpeechRecognition, Pytsx3, Pycaw, Psutil, Windows Automation

- Built a modular Windows automation assistant in Python featuring speech recognition, text-to-speech, and intent parsing.
- Integrated real-time OS diagnostic monitoring (CPU, RAM, battery) via psutil, master volume control via Pycaw, and timers.
- Developed utility automation including safe AST mathematical evaluation, notes logging, and automated web search.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data & Analytics: MS Excel, Power BI, Pandas, Data Analysis, Data Cleaning, Data Processing

Web Data & Ingestion: Requests, BeautifulSoup, Web Scraping

Spreadsheet & Automation: OpenPyXL, Excel Automation, Python Automation, Windows Automation

Software Concepts: Object-Oriented Programming (OOP), Modular Architecture

EDUCATION

B.Com Computer Application | Al-Ameen College, Edathala

Class of 2026 | Kochi, India

CERTIFICATION & ACHIEVEMENT

NCC 'C' Certificate Holder | National Cadet Corps (NCC)

Ministry of Defence, Govt. of India
